- Educusement

---

**EXPLORE OUR PROGRAMS**

**EARLY CHILDHOOD AND FAMILY STUDIES (BA)**
- Prepare to make a difference in the lives of children and families through the study of early childhood development, early learning, and family and community engagement.
- Our interdisciplinary major is designed to introduce you to a variety of perspectives in serving children from birth through age 8. You’ll apply coursework through field-based service and research to support children and their families in the community.

**EARLY CHILDHOOD AND FAMILY STUDIES (online degree completion option)**
- A cohort-based model, the program is designed for students with at least 70 transferable credits.
- Complete coursework on your own schedule, with weekly activities and assignments that help you keep pace and interacting with your classmates and instructors.
- Students already working in the field can do service learning at their current jobs.

**EDUCATION, COMMUNITIES AND ORGANIZATIONS (BA)**
- Every day you educate! From classroom teachers to youth development, policy reform, professional development and health care, teaching and learning can be found in every community and profession.
- The ECO major prepares students to use their knowledge and skills in human development, equity studies, learning across contexts, and organizational change to work with communities.
- By partnering with a local community-based organization, students complete a year-long capstone internship to accomplish a common goal and gain valuable professional experience.

**EDUCATION, LEARNING AND SOCIETY (minor)**
- Gain a strong background about how humans learn, and how society, environment, and culture shape that learning.
- Graduates may pursue careers in education as well as interests in issues of public policy, social justice, or learning and cognition.

---

**Community-based learning**

**KENDALL FUJIOKA (ECFS ’14)**
- Coordinator of Pupil Support Services and Attendance
- ABC Unified School District, Los Angeles

"My service learning gave me direct experience working with some of the vulnerable populations that I work with today. This has helped me become a more effective social worker in my practice with children and families of diverse ethnic and cultural backgrounds, as well as those experiencing adverse experiences such as poverty, homelessness, incarceration and mental illness."

---

**Undergraduate Research**

**NATIONALLY-RECOGNIZED FOR EXCELLENCE**

At UW College of Education, one of the nation’s top 10 education schools, you’ll learn from faculty who are leading researchers and respected teachers. Our faculty prepare graduates equipped to thrive in socio-economically diverse educational environments with a focus on equity.
“Early childhood education is the premiere opportunity to give people the chance to succeed. Changing children’s early experiences can change their entire future and has the chance of altering the dynamics of our nation.”

MARY SPRUTE (ECFS ‘14)  
Legislative and Advocacy Associate
